

POSITIVE
Low Cost
SMOKE CONTROL

alco
**SR-151
PELLETS**

● You get positive smoke control—real “in-port” protection—*without* special feeders or other equipment expense. SR-151 eliminates the cause of smoke and saves fuel by improving combustion and preventing formation of soot on fireside surfaces.

Nalco Marine Service covers application of SR-151 Combustion Catalyst in your boilers... Supplies available at major Lakes ports. Write for full details—and plan to keep your coal burning smokeless.

For Oil-Fired marine boiler furnaces: Nalco SR-155, the Complete Fuel Oil Additive.

PLASTILUBE
THE SUCCESSOR TO GREASE

Specifying top-quality lubricants expresses pride in your ship's equipment—and it's plain good sense, as well.

PLASTILUBE, “the successor to grease,” has many marine uses—for deck winches, landing booms, rudders, anchor windlasses, stokers, bearings, etc.

For further information about this remarkable non-melting, water resistant, multi-purpose lubricant, write or call—
