INDEX; VOLUME 18

Compiled by: ROBERT E. LEE, Editor

This effort represents the first attempt to index a complete volume of Telescope. We have long been aware of the very real need for such an index, but the means to accomplish the task have not previously been available to us. Such an undertaking is no small job, and there is no assurance that the precedent set here will continue in future volumes unless the response is such that the value of the effort is confirmed.

One note to the user of this index: Pages 205 through 228 appear in the first issue of Volume 18. These page numbers were inadvertantly carried forward from Volume 17, and are incorrect. They should have been pages 1 through 24. To avoid further confusion, the actual page numbers for Volume 18; Number 1, have been used here. Pages 1 through 24 do not exist.
