

MARINE NOTES

The tug D'Alton McCarthy will go back to Squaw Island and spend a few weeks fishing.

The tug Sancy Jim left Wednesday evening for Cabot's Head to assist in raising the machinery of the steam barge Kincardine. This barge was burned near the Head a few years ago. The tug had a scow in tow. Capt. Alex. Clark is interested in this work.

The G. N. Transit Co are taking the machinery out of the hull of the steamer Baltic. Chief engineer Lewis, of the steamer, Majestic, is superintending the work. The boilers, which are in first-class condition, are of the most value of what is left.

The Barrie Fair is held on the 1, 2, and 3,
