BUY A FREIGHTER.

The Observer, Sarnia, says: Owing to the unusual amount of freight being handled by the Northern Navigation Co. this year, it has been necessary to provide extra tonnage to carry it. A large American package freight steamer has been purchased and will be added to their Lake Superior fleet which will make four vessels running out of Sarnia to Port Arthur and Fort William. It is expected the vessel will be available for the route by Sept. 1st, and will be immediately placed in commission. The steamer is an iron hull, twin screw, and has double compound engines, steam steering gear, double bottoms, watertight bulkheads, etc., and up-to-date in every particular. She will carry about 1,500 tons of cargo."
