## TROUBLE SETTLED.

The machinists and the Coltingwood Shipbuilding Co. have amicably settled the difference which caused a break in their relations for a few days last week. Mr. Gibbons, business agent of the Machinists' Union, came from Toronto and conferred with Manager Smith and the men returned to work on Friday morning. The men complained of dust and smoke coming into their department from the adjoining moulding shop and asked for a partition which will be supplied as requested. The shops were idle four days, but to-day are again running in full blast. A few of the men had gone away before the settlement had been reached, but their places have since been filled.
