# Steamers Are Ready.

---

The big freighter Emperor built in the shipyards here and launched on Dec. 17th last, is completed and practically ready to go into commission. Mr. H. Trott is putting on the furnishings, this week, which in itself is a large item.

The C. P. R. steamer Alberta which has been lengthened forty feet during the winter, is also ready, this contract being completed some time before the date specified. As soon as the ice permits the steamer will be taken out of dry dock No. 1 and leave shortly after for Owen Sound to take her place on the C. P. R. route between that port and the head of the lakes. With the additional length the steamer presents a very attractive appearance.
